A front-end developer and web accessibility advocate that is highly adept at working both independently and collaborating in a team to build accessible and responsive web interfaces.

WORK EXPERIENCE

FSTACKDEV

April 2022 - present

Junior Frontend Engineer

Remote

- Assisted in building scalable, fully responsive and accessible websites/webapps for several businesses and clients.
- Worked hand-in-hand with the back-end engineering team and design team in structuring and building websites/webapps to satisfy the needs of the client.
- Assisted in fixing bugs in development code.

DellMarvis Smart Technologies Ltd.

August 2022 - October 2022

Frontend Engineer (Contractor)

Remote

- I orchestrated and developed the frontend infrastructure, design and functionality for DellMarvis' website using Nextjs, GSAP, Styled-Components, React-Leaflet and Formik.
Site: <https://dellmarvis.com>

FSTACKDEV

April 2021 - April 2022

Frontend Developer (Intern)

- Assisted in migrating legacy code to modern day standards.
- Assisted in removing bootstrap from company stack and moving to modern day css solutions, thereby eliminating dead code and reducing bundle size by 20%.
